

# Polytron MTC

## Product Description

POLYTRON Metal Treatment Concentrate (MTC) technological additive package is a uniquely blended petroleum based formula that is compatible with all motor oils, gear oils and other lubricants.

POLYTRON MTC technology uses a micro-metallurgical process to form (from the original metal) a durable polished micro - layer of metal that dramatically resists wear, extreme pressure and excessive temperature. Metal surfaces remain treated at all times, which provides for immediate start-up lubrication. Friction and wear are substantially reduced resulting in maximum equipment life, performance and oil and fuel economy.

## Applications

Use Polytron MTC in motor oils, transmission and torque fluids, tractor hydraulic fluids, paper machine oils, industrial oils, knit oils, handy oils, gear oils and metalworking cutting oils.

- Automatic and manual transmissions
- Differentials and gearboxes
- Bearings and bearing journals
- Power steering units
- Pumps
- Air compressors
- Cooling systems
- Hydraulic power systems in heavy duty off road equipment and farming machinery
- Mining and smelter equipment
- Railroad equipment
- Oil and water wells
- Drilling equipment
- Machine shops equipment: grinding, drilling milling etc.
- Cotton pickers
- Air tools

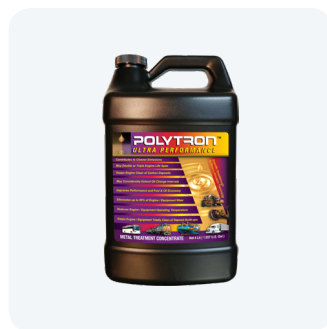

## Why Choose Polytron MTC

- ✓ Longer oil change interval (based on the initial condition of equipment)
- ✓ Lower oil consumption
- ✓ Keeps equipment parts clean contributing to better performance
- ✓ Extends the oil life of the filter
- ✓ Lowers operating temperature and noise level
- ✓ Eliminates 95-99% of equipment wear considerably extending its service life.
- ✓ Protects equipment in a wide range of temperatures
- ✓ Protects equipment for a reasonably long time in the event of loss of lubricating fluid
- ✓ Performs consistently well in severe operating conditions of dust, moisture and extreme temperatures

16-ounce (473 ml) plastic bottles for passenger cars and pickup trucks

- 24 bottles / case
- 108 cases / pallet
- 10 pallets / 20-ft. container
- 20 pallets / 40-ft. container

4-liter plastic bottles for trucks and heavy-duty equipment

- 6 bottles / case
- 54 cases / pallet
- 10 pallets / 20-ft. container
- 20 pallets / 40-ft. container

19-liter (5-gal) pails for trucks and heavy-duty equipment

- 56 pails/pallet
- 10 pallets / 20-ft. container
- 20 pallets / 40-ft. container

208-liter drums for trucks and heavy duty equipment

- 79 drums / 20-ft container
